EXPANDED ROV SERVICES

Underwater inspection, sampling, mapping and recovery

200 m

Maximum operating depth

Approx. 400 m operating radius

Subject to site conditions

WHAT WE CAN INSPECT

Boats and vessels

Hull, propeller, rudder and thruster inspections.

Marinas and quays

Checks of pontoons, moorings, mooring lines and underwater structures.

Municipalities and port authorities

Inspection of quay facilities, subsea pipelines and municipal infrastructure.

Industry and offshore

Underwater checks of installations, foundations and technical equipment.

WHAT WE CAN DELIVER

Video, photos and assessment

Inspection footage and still images, with a professional assessment by the ROV operator.

Sonar and 3D mapping

Seabed surveys, object location and 2D or 3D documentation with measurement and position data.

Measurement and sampling

Cracks, wear, corrosion and damage. Measurement reports and water or seabed samples as required.

Search and recovery

Location and recovery of lost tools, equipment and boat parts from the seabed.

NEED HELP WITH AN UNDERWATER JOB?

We help private boat owners, businesses and public-sector customers. Contact us to discuss the job or request a quote.
